

The Campus Planning Committee (CPC) provides advice and feedback to the Campus Planning and Development office. The CPC works via regular, open meetings, occurring approximately once monthly. In addition, a work session may be scheduled, contingent on need. The work sessions provide needed feedback on time sensitive issues, ongoing review of multi-stage projects, and facilitate a more detailed consideration of complicated proposals. Participation in work session meetings is by invitation only. All major campus planning initiatives are presented at the regular meetings of the CPC.
